

Himanshu Yadav

Frontend Developer

Mumbai, Maharashtra | +91 7499506824 | himanshuyadav7852@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of experience shipping production React.js and Next.js applications. Proven track record of driving 30% organic traffic growth through SEO optimization and Core Web Vitals improvements. Skilled in TypeScript, Tailwind CSS, REST APIs, and full-stack development with FastAPI and PostgreSQL, with a strong focus on performance, scalable architecture, and end-to-end feature ownership.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Framer Motion

Backend and APIs: REST APIs, Firebase (Auth and Firestore), Supabase (PostgreSQL), SQLAlchemy, Resend, Nodemailer

Performance and SEO: Core Web Vitals, SSR, SSG, React Server Components, Metadata Optimization, Dynamic Sitemaps, Open Graph, Google Search Console

State and Forms: React Hooks, Context API, React Hook Form, Zod, JWT Authentication

DevOps and Tools: Git, GitHub, Docker, Vercel, Celery, Redis, SMTP, GitHub PR Reviews

WORK EXPERIENCE

Frontend Developer | [PureCode AI](#) | Hyderabad (Remote) | Oct 2023 to Dec 2025

- Built and maintained reusable UI components in Next.js and Tailwind CSS across 5+ product areas including Discover, Share, Enterprise, and Invite workflows, improving design consistency and cutting per-feature development time.
- Audited 10+ product pages for SEO and performance; optimized SSR rendering, metadata, Core Web Vitals, and implemented dynamic sitemap and robots.txt, contributing to approximately 30% increase in organic traffic.
- Managed production deployments via Vercel and enforced code quality through structured GitHub PR reviews, integrating REST APIs and Firebase services with SSR/SSG and lazy loading for faster page performance.
- Collaborated with design and product teams to translate Figma mockups into pixel-perfect, responsive interfaces using Tailwind CSS, delivering consistent experiences across desktop and mobile.

PROJECTS

WorkPulse HR – Full-Stack HRMS Application [GitHub](#) | [Live](#)

Next.js (App Router), TypeScript, Tailwind CSS, FastAPI (Python 3.12), Supabase (PostgreSQL), SQLAlchemy 2.0, Redis, Celery, Docker, SMTP

- Built a production-grade full-stack HRMS with a Next.js frontend and FastAPI backend, using Supabase PostgreSQL, SQLAlchemy 2.0 for type-safe ORM queries, and Celery with Redis for async task processing including bulk payslip generation and automated SMTP email delivery.
- Designed a multi-tenant architecture using row-level tenancy with org-scoped JWT claims supporting Admin, HR, and Employee roles, providing isolated data access across employee records, leave management, and attendance modules.
- Engineered a statutory payroll computation engine calculating PF, ESI, and TDS deductions, with edge case handling for midnight-spanning attendance sessions by auto-splitting records across calendar days for accurate daily totals.

OpenThoughts – User-Generated Content Platform [GitHub](#) | [Live](#)

Next.js (App Router), TypeScript, Tailwind CSS, Firebase Auth, Firestore, Nodemailer

- Developed a production content platform supporting guest and authenticated post submissions, with a user dashboard for tracking posts, likes, comments, and saved content; secured with Firebase Auth and Firestore role-based security rules.
- Built an admin moderation queue where posts are held in a pending state before publication, maintaining content integrity without exposing review status to end users.
- Achieved production-grade SEO via Next.js App Router patterns including dynamic metadata, slug-based routing, canonical tags, Open Graph, auto-generated sitemap and robots.txt, with active Google Search Console monitoring.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Pranveer Singh Institute of Technology, Kanpur | 2019 to 2022

Diploma in Computer Science and Engineering

Government Polytechnic, Pratapgarh | 2016 to 2019
